◆ Overall Financial Performance

Metric	2023	2024	Difference
Confirmed Reservations Markup	179.70K	205.15K	+25.45K ↑
Revenue from Confirmed Res.	301.05K	328.96K	+27.91K ↑
Cost of Confirmed Res.	121.35K	123.81K	+2.46K ↑
Net Margin Increase			Improved 

Conclusion: 2024 shows improved financial performance with increased revenue, markup, and only a slight rise in costs.

◆ Reservation Statistics

Metric	2023	2024	Change
Confirmed Reservations	105	107	+2
Cancelled Reservations	37	34	-3
Pending Reservations	28	33	+5

Conclusion: Slight increase in confirmed and pending reservations in 2024, with fewer cancellations – indicating improved booking confidence or customer satisfaction.

◆ Lost Potential Markup

Category	2023	2024	Change
From Cancelled Reservations	69.75K	68.86K	-0.89K ↓
From Pending Reservations	60.54K	73.76K	+13.22K ↑

Conclusion: While cancellations caused slightly less lost markup in 2024, pending reservations had a significantly higher potential loss – possibly due to higher-value bookings not being finalized yet.

◆ Monthly Markup Trend (Confirmed Reservations)

- **Peak month in 2023:** August (25.5K)
- **Peak month in 2024:** June (31.5K)

Trend Insight:

- The highest earning month shifted from **August** (2023) to **June** (2024), possibly due to changes in travel demand, promotions, or seasonality.

- 2024 had stronger monthly performance from **April to August**, surpassing 2023 values.
-

◆ Destination Type Insights

- **Beach** and **City** destinations remain top contributors in both years.
 - **Mountain** and **Lake** types saw moderate improvements in 2024.
 - More even distribution across destination types in 2024 suggests diversification in customer preferences or offerings.
-

◆ Lost Potential by Month

- **2023:** February had the **highest lost potential** (~23K), mostly from **cancellations**.
 - **2024:** December was the **most impacted** (~19K), with high pending values.
 - Overall, **2023 losses were more due to cancellations**, while **2024 losses leaned toward pending reservations**, indicating customers might be taking longer to confirm.
-

✓ Key Takeaways

- **2024 outperforms 2023** in all key financial metrics.
- **Fewer cancellations** and more confirmed reservations indicate operational improvements.
- **Higher pending reservation value** in 2024 is both an opportunity and a risk.
- **Destination variety and demand timing have shifted**, with more revenue concentration in early summer (especially June).

Insights:

- There's a major **shift in market segments**.
 - 2023 was dominated by **older age groups** (Golden Globetrotters and Young Explorers).
 - 2024 saw a surge in **middle-aged travelers** (Mature Adventurers and Established Travelers).
- Aspiring Professionals (29–38)** remained consistently strong in both years.
- The **Young Explorer** segment saw a **significant decline** in 2024, possibly due to price sensitivity or changing travel habits.

VS

 1. Confirmed Reservations Markup by Gender

Gender	2023 Markup (K)	2024 Markup (K)	Absolute Change	% Change
Female (F)	94.37K	129.93K	+35.56K	+37.7% ↑
Male (M)	85.33K	75.22K	-10.11K	-11.8% ↓

Insights:

- In 2024, **women dominated the market**, contributing **63.4% of total markup**, up from **52.5% in 2023**.
 - **Male travelers decreased** both in absolute value and relative share.
-

 2. Monthly Trends by Gender

2023:

- Male and female trends were fairly **balanced** throughout the year.
- Peak activity was in **June–September**, with a noticeable spike in August.

2024:

- **Female travelers had stronger peaks**, especially:
 - **June, July, and September**
- Male contribution remained **relatively flat** and lower than females throughout the year.

Insight: In 2024, women are driving the summer season, especially around **popular beach and nature destinations**.

VS

Observation:

- *Topola* and *Tara National Park* saw the **largest profitability boost** in 2024.
- *Apatin* saw a sharp **drop in markup** despite having 5 reservations in 2023.
- *Novi Sad* gained in both reservation count and profitability.
- *Oia (Santorini)* and *Toroni* saw **major jumps in profitability**.
- *Heraklion* remains **consistently top-tier**, though slightly less than in 2023.
- More **concentration of high-markup destinations** in 2024 vs. a broader mix in 2023.

Key Takeaways:

- **2024 brought more high-markup performance in fewer concentrated cities** — both in Serbia and Greece.
- **Oia, Toroni, and Topola** are the new standout destinations in terms of profitability.
- Some 2023 destinations saw a **significant fall in markup** in 2024 despite similar booking counts (e.g., Apatin).

VS

Key Insights:

- **Highest trip month in 2023:** October (14 trips)
- **Highest trip month in 2024:** July (21 trips)
- **Consistently low months (2023):** Jan to Apr (6 trips each)
- **Strong growth in summer 2024:** June (20) and July (21) show a major increase from 2023 values (June 7, July 12)
- **Decreased activity in Aug–Dec 2024** compared to 2023

FINAL TAKEAWAYS:

- **2024 was a stronger year** overall in revenue, efficiency, and strategic destination targeting.
- **Traveler profile evolved**, with more middle-aged and female travelers dominating key seasons.
- **Operational efficiency improved**, with lower cancellations and better markup per booking.
- Focus for growth:
 - Convert high-value pending reservations
 - Continue capitalizing on strong-performing cities
 - Target female and middle-aged demographics with summer-focused offerings
